

The chart displays the logarithmic incidence of COVID-19 in Barão de Grajaú/MA. The y-axis, labeled 'Log Inc', uses a logarithmic scale with major ticks at 10^0 and 10^1 . The x-axis shows dates from 06/18/2020 to 11/21/2022. The 'Moving Average' (black line) shows two significant peaks: one in early 2021 reaching approximately 15, and another in late 2021 reaching approximately 12. The 'Data of citie' (red stars) shows individual data points, with many points at 10^0 and several points above 10^1 during the peaks. A small peak in late 2022 is also visible, reaching approximately 1.2 on the log scale.
