

The figure is a semi-logarithmic plot titled "Ernestina/RS". The y-axis is labeled "Log Inc" and uses a logarithmic scale with major ticks at 10^0 and 10^1 . The x-axis represents time, with labels for 06/03/2020, 01/22/2021, 07/08/2021, 02/02/2022, and 08/23/2022. The plot contains two data series: "Moving Average", represented by a solid black line, and "Data of citie", represented by red stars. The black line shows a sharp increase starting in late 2020, peaking around late 2021 at a value near 10^1 , followed by a decline and then a resurgence in early 2022. The red stars represent individual data points, many of which are at the 10^0 level, with several outliers reaching values above 10^1 .
