

The chart displays the logarithmic incidence of COVID-19 in Lebon Régis/SC. The y-axis, labeled 'Log Inc', is on a logarithmic scale with major ticks at  $10^0$  and  $10^1$ . The x-axis shows dates from July 2020 to October 2022. The 'Moving Average' (black line) shows a sharp increase starting in early 2021, peaking in late 2021 at approximately 30, and then declining with some fluctuations. The 'Data of citie' (red stars) shows individual data points, many of which are at  $10^0$ , indicating zero incidence, and others that follow the general trend of the moving average, with some outliers reaching above  $10^1$ .
