

The figure is a semi-logarithmic plot titled "Esmeralda/RS". The y-axis is labeled "Log Inc" and uses a logarithmic scale with major ticks at 10^0 and 10^1 . The x-axis represents time, with labels for 06/19/2020, 04/05/2021, 09/24/2021, 02/02/2022, and 10/15/2022. The plot contains two data series: a black line representing the "Moving Average" and red stars representing the "Data of citie". The black line shows a sharp increase from late 2020 to early 2021, followed by a decline and then a period of relative stability around 10^0 in mid-2021. It then rises again towards the end of 2022. The red stars represent individual data points, showing a wide distribution of values, with several points reaching above 10^1 in early 2021 and late 2022, and many points remaining at 10^0 throughout the period.
