

The figure is a line and scatter plot titled "Equador/RN". The y-axis is labeled "Log Inc" and uses a logarithmic scale with major ticks at 10^0 , 10^1 , and 10^2 . The x-axis represents time, with labels for 06/10/2020, 03/26/2021, 09/05/2021, 02/16/2022, and 11/25/2022. The plot contains two data series: a black line representing the "Moving Average" and red stars representing the "Data of citie". The black line shows a highly volatile trend with several sharp peaks, notably around late 2021 and early 2022. The red stars represent individual data points, many of which are at the 10^0 level, while others reach up to 10^2 .
