

The figure is a semi-logarithmic plot titled "Log Inc" and "Japira/PR". The y-axis represents the logarithm of incidence, with major ticks at 10^0 and 10^1 . The x-axis represents time, with labels for 06/20/2020, 03/18/2021, 08/06/2021, 02/28/2022, and 11/24/2022. The plot contains two data series: a black line for the "Moving Average" and red stars for the "Data of citie". The data shows a period of low incidence from mid-2020 to early 2021, followed by a sharp increase peaking around late 2021, and then a decline with some fluctuations through 2022.
