

The chart displays the logarithmic incidence of COVID-19 in Peritoró, MA. The y-axis, labeled 'Log Inc', uses a logarithmic scale from 10^0 to 10^1 . The x-axis shows dates from November 2020 to December 2022. The 'Moving Average' (black line) shows two distinct waves of infection. The first wave peaks in late 2020/early 2021, followed by a sharp decline in early 2021. The second wave peaks in mid-2021 and then declines. The 'Data of citie' (red stars) shows individual data points, many of which are at the 10^0 level, indicating low incidence, and others reaching up to 10^1 during the peaks.
