

The chart displays the progression of COVID-19 cases in Campo Alegre de Lourdes, Brazil. The y-axis, labeled 'Log Inc', uses a logarithmic scale to represent the number of incidents, ranging from 1 to 1,000. The x-axis marks time from February 2020 to November 2022. The 'Moving Average' (black line) shows a notable increase starting in late 2021, peaking at approximately 200 in late 2021 before a sharp decline. The 'Data of citie' (red stars) shows individual daily reports, with most values clustered between 1 and 10, and a few significant spikes, including one near 1,000 in late 2021.
