

The figure is a semi-logarithmic plot titled "Almas/TO". The y-axis is labeled "Log Inc" and uses a logarithmic scale with major ticks at 10^0 and 10^1 . The x-axis represents time, with labels for 06/24/2020, 10/15/2020, 03/05/2021, 05/30/2021, and 08/04/2022. A legend in the top-left corner identifies the black line as the "Moving Average" and the red stars as the "Data of citie". The plot shows a black line representing the moving average and red stars representing individual data points. The data points are mostly at 10^0 , with several points reaching up to 10^1 in late 2020 and early 2021. The moving average line shows a significant peak in late 2020, followed by a decline and then a second, higher peak in early 2021, before a sharp drop and a final small peak in late 2021.
