

The graph displays the logarithmic scale of new infections (Log Inc) over time for Maravilha/AL. The y-axis is labeled 'Log Inc' and ranges from 10^0 to 10^1 . The x-axis shows dates from May 2020 to August 2022. The legend indicates two data series: 'Moving Average' (black line) and 'Data of citie' (red stars). The moving average line shows a significant peak in late 2021, reaching approximately 10, followed by a sharp decline and a subsequent rise in early 2022. The 'Data of citie' points are scattered around the moving average, with several points reaching the 10^1 level in late 2021 and early 2022.
