

The figure is a semi-logarithmic plot showing the progression of COVID-19 in São Félix de Balsas, MA. The y-axis, labeled 'Log Inc', is on a logarithmic scale from 10^0 to 10^1 . The x-axis displays dates from 07/08/2020 to 11/17/2022. A black line represents the 'Moving Average' of daily new infections, while red stars represent individual 'Data of citie' (city data). The plot captures two waves of infection. The first wave peaks in early 2021 at approximately 10 on the log scale. The second wave is more intense, peaking in late 2021 at over 20 on the log scale. A bar chart at the bottom of the plot shows the daily number of deaths, with a notable increase during the second wave.
