

The figure is a semi-logarithmic plot titled "Mutunópolis/GO". The y-axis is labeled "Log Inc" and uses a logarithmic scale with major ticks at  $10^0$ ,  $10^1$ , and  $10^2$ . The x-axis represents time, with labels for 08/12/2020, 03/23/2021, 08/10/2021, 06/08/2022, and 08/20/2022. The plot contains two data series: a black line representing the "Moving Average" and red stars representing the "Data of citie". The black line shows a significant peak in late 2021, reaching a value of approximately 15 on the log scale, followed by a decline and a smaller peak in early 2022. The red stars represent individual data points, showing a wide range of values, with several points reaching values above 10, and one point reaching approximately 100 in late 2021. The plot also includes a horizontal grid line at  $10^1$  and a vertical grid line at 03/23/2021.
