

The chart displays the logarithmic incidence of COVID-19 in São Sebastião do Alto/RJ. The y-axis, labeled 'Log Inc', uses a logarithmic scale from 10^0 to 10^2 . The x-axis shows dates from 05/09/2020 to 11/21/2022. A black line represents the 'Moving Average' and red stars represent the 'Data of citie'. The plot shows a significant peak in the moving average around late 2021, reaching approximately 25, while the daily data points (red stars) show more variability, with some points reaching up to 30 and others dropping to 1.
