

The figure is a semi-logarithmic plot titled "Atalaia/PR". The y-axis is labeled "Log Inc" and uses a logarithmic scale with major ticks at 10^0 and 10^1 . The x-axis represents time, with major ticks at 06/25/2020, 03/08/2021, 09/28/2021, 04/21/2022, and 11/25/2022. The plot contains two data series: "Moving Average", represented by a solid black line, and "Data of citie", represented by red stars. The black line shows a significant peak in late 2021, reaching above 10^1 , followed by a decline and a smaller peak in early 2022. The red stars represent individual data points, showing a similar trend but with more variability, including several points above 10^1 in late 2021 and early 2022.
