

The graph displays the logarithmic incidence of COVID-19 in Pirapemas/MA. The y-axis, labeled 'Log Inc', is on a logarithmic scale with major ticks at 10^0 and 10^1 . The x-axis shows dates from 05/12/2020 to 02/21/2022. A black line represents the 'Moving Average' and red stars represent 'Data of citie'. The incidence starts at 10^0 in late 2020, peaks at approximately 2×10^1 in late 2020, declines to 10^0 by early 2021, and then rises to a second peak of approximately 2×10^1 in early 2021, before declining again and showing a small resurgence in early 2022.
